<link rel = "?" hreft= "?">

Tags Attributes
Some tags need more information in order to work. In order to do this, you need to do to
use **attributes**

Accessibility
We want to make sure our websites are **accessible** to as many people as possible!
Accessibility Considerations-
Low-bandwidth users(people with little bandwidth or unstable internet
connections).
Visually impaired users(use screen readers to surf the web)
Low English proficiency users(content displayed must be understandable)
